## Black Gold

**A special rough surface for an impenetrable protection, taste the difference!**

Black Gold is the first Flonal line with the UHS - Ultra Hard Surface coating. A special substrate, resulting from the aerospace industry, which forms a rough basis extremely hard and compact, as well as resistant to high temperatures: ultimate protection, scratch-proof and abrasion resistant. The same coating, enhanced and reinforced with mineral particles, offers premium release properties over time. The forged body shape ensures stability, while the high thickness of aluminium bottom guarantees an even heat distribution to make tasty dishes.

### AVAILABLE ITEMS

THICKNESS 4 MM

#### FRYING PAN

Ø20CM / Ø24CM / Ø26CM
